

July 16, 2021

Dear Valued HSQ Customer,

Registration is now open for the next HSQ Factory Certified Training sessions.

NOTE: If you were previously registered for the 2020 Training session that was cancelled due to COVID-19, please respond and you will be given priority enrollment.

In an effort to provide the tools necessary for you to be successful, we will be conducting RTU Technician and MISER Training seminars led by our qualified instructors. These hands-on, comprehensive courses will be offered at our Hayward, California facility and last for three days each.

The first training session begins **Wednesday, February 23, 2022** and is designed for the RTU Technician. The second session begins on **Monday, February 28, 2022** and is intended for the MISER Operator and/or MISER System Manager. The exact training content will be dependent on the aptitude of the students. If necessary, there will be MISER Operator and System Manager Training classes running concurrently.

If registering for MISER Training, please specify whether you are interested in MISER Operator Training or MISER System Manager Training.

The cost for these classes is \$1,950 if taking one class and \$3,600 if taking two. A \$250 discount will be applied if the student registers for both classes by December 22, 2021. Final registration ends January 20, 2022.

NOTE: Rates are based on a minimum of six students per class. Classroom Training will be scheduled once the minimum number of participants are enrolled.

Register early, seating is limited. Classes can be paid with a P.O. or in full by December 22, 2021.

If you have any questions, feel free to email us at training@hsq.com or you can call HSQ at (510) 259-1334.

A syllabus of the training sessions is available at http://www.hsq.com/Training_Info_2022.pdf.

A registration form is available at http://www.hsq.com/Training_Registration_Form_2022.pdf.

It is also possible to enroll online at <http://www.hsq.com/Enrollment.htm>.

We look forward to seeing you, and please let us know if we can help you in any way.

Sincerely yours,

Gus Jimenez
Director of Projects and Operations
HSQ Technology
